New gas spring for the conveyor of GL 541 on-line for Signasetter

In November 1999 we introduced a lockable gas spring on the above mentioned on-line processors. This was done in order to ease the work with the conveyor and in order to increase the security.

Please see the below picture for details.

For on-line processors, which are covered by warranty, all necessary parts for this up-grade can be ordered free of charge. Please inform the serial number of the processor when contacting us.

For GL 541 on-line processors for Signasetter with serial number 98447509 or higher the following parts numbers should be ordered: 454226 and 454234.

For GL 541 on-line processors for Signasetter with a serial number lower than 98447511 the following part numbers should be ordered: 454226 and 448624.
